How to organize a local SRE France meetup

Introduction

We encourage the organization of local SREs meetups in order to decentralize the knowledge and to meet people sharing the same interests in your city.

Getting started

First things to do

- Before choosing the date, check if there's no other events at the same time (SRECon, DevOps Days, Meetups, etc) and it's not a [holiday in France](#).
- Announce the event using our official Twitter and Telegram accounts via a pull request [here](#)
- Define the format of the event, only talks, fireside chat, round table discussion or workshop

What to do one week before your event

- Publish updates about the event, like the agenda, topics and speaker names
- Send a message to every speaker to tell more about the hardware, network and software (Zoom, Google Meet, etc) required for the event and to ask if they have some special needs

What to do the day of your event
